# **AMENDMENTS TO THE CLAIMS**

Claims 1 to 28 (cancelled)

Claim 29 (currently amended)

A carbohydrate peptide conjugate which induces an antibody response against a carbohydrate tumor antigen, said conjugate being selected from the group consisting of the conjugates of the following formulae (a) to (d)

## wherein:

- K is a lysyl residue;
- T is A CD4<sup>+</sup> cell peptide epitope;
- B is a carbohydrate moiety consisting of a tumor antigen, or a carbohydrate derivative thereof.

- B denotes a structurally defined carbohydrate moiety which is a tumor
  antigen, or a derivative thereof, containing B epitope other than a sialoside, or
  several identical or different B epitopes;
- T denotes a peptide comprising one CD4\* T epitope or several identical or different T epitopes;
- K denotes a lysine residue;
- n is an integer from 1 to 13;
- m is an integer from 1 to 9; and

wherein the B and T groups are covalently attached to the poly lysine carrier.

Claim 30 (currently amended)

A conjugate of claim 29 wherein the carbohydrate moiety  $\underline{B}$  is galactosyl.

Claim 31 (cancelled)

Claim 32 (currently amended)

A conjugate of claim 29 wherein the earbohydrate moiety  $\underline{B}$  is a galactosyl residue and is substituted with a glycosyl residue.

Claims 33 – 37 (cancelled)

#### Claim 38 (currently amended)

A conjugate of claim 29 wherein the carbohydrate  $\underline{B}$  is selected from the group consisting of Tn antigen, di-Tn antigen, Tri-Tn antigen,  $T^*$  antigen and hexa-Tn antigen.

### Claim 39 (previously presented)

A pharmaceutical composition comprising the conjugate of claim 29 and a suitable carrier and adjuvant.

### Claim 40 (previously presented)

A vaccine comprising the conjugate of claim 29.

#### Claim 41 (cancelled)

## Claim 42 (previously presented)

An immunogenic composition comprising at least one carbohydrate peptide conjugate of claim 29 wherein said composition is capable of increasing the survival of a tumor bearing human or animal.

### Claim 43 (previously presented)

An immunogenic composition comprising at least one carbohydrate conjugate of claim 42 wherein said conjugate comprises different carbohydrate antigens.

# Claim 44 (previously presented)

A method of inducing an immune response to at least one member of the group consisting of B-cells and CD4<sup>+</sup> T-cells in a human or animal body, wherein the conjugate of claim 29 is administered to said human or animal body.

Claims 45 - 46 (cancelled)

# Claim 47 (previously presented)

A method of vaccination of a human or animal body wherein the conjugate of claim 29 is administered to said human or animal body.
